# Welcome to Enterprise Data Platform

Seamlessly Onboard, Manage, and Analyze Your Enterprise Data

EDP is a next-generation enterprise data platform designed to streamline data onboarding, management, and analysis. With intuitive workflow automation, AI-powered document insights, and seamless integration capabilities.

Create a Workflow

Browse Data

## Key Features

### Data Workflow Automation

Easily create automated workflows to speed up your data processing using built-in tools.

### Data Lake Browsing

Explore, query, and manage your loaded data effortlessly in one centralized platform.

### Reconciliation & Validation

Ensure data integrity with automated reconciliation processes and validation steps.
